

“ FPA is a rare organisation that is able to join the dots of the climate crisis and fuel poverty, with policy and campaigns rooted in the lived experience of working class people - Sam Mason, Policy Officer, PCS trade union ”

We're a group of ordinary people fed up with being robbed by greedy energy companies through spiralling bills and cruel prepayment meters. Alongside pensioners groups, disabled campaigners, trades unions, tenants' organisations and others on the front line of fuel poverty, we're using protest and direct action to fight for real solutions to the cold homes crisis.

We are determined to see the UK energy system, and our homes, decarbonised as quickly as possible, with a just transition for communities and workers. Far from making us poorer, the move away from fossil fuels will bring us more affordable energy, better housing and cleaner air, and will help keep down the cost of food by helping to stabilise the climate. We believe that this is an opportunity to actively reduce the economic inequality that is costing so many lives.

## WHAT WE DO

- ☀️ Organise nationwide mobilisations against cold, damp homes!
- ☀️ Lobby politicians, energy companies and the regulator, Ofgem, for energy policies which are fair, affordable and sustainable
- ☀️ Provide a public platform for people's stories, demands and anger, and open channels to speak truth to power
- ☀️ Offer support to grassroots energy justice campaigns
- ☀️ Bring together activists, experts and people living in fuel poverty to share learning, debunk lies and empower ourselves with knowledge of the energy system. Go to [bit.ly/FPAFuelForThought](https://bit.ly/FPAFuelForThought) to find out more about these free, monthly sessions

**JOIN THE ENERGY PRICING REVOLUTION!**

[FUELPOVERTYACTION.ORG.UK](https://FUELPOVERTYACTION.ORG.UK)

Fuel Poverty Action (FPA) is a UK-wide, grassroots organisation which campaigns to prevent fuel poverty and climate disaster.

### OUR AIMS

-  To expose the lie that it's our fault if we struggle to pay the bills, and that green solutions are too expensive
-  To put power and connections in the hands of communities who are challenging energy injustice
-  To ensure that marginalised people benefit from the sustainable energy transition
-  To campaign on multiple fronts for Energy For All, which unites the fight for the climate with battles against poverty and poor housing

## THE ENERGY FOR ALL CAMPAIGN

# ENERGY FOR ALL

Energy For All is a plan to speed up the phase-out of oil and gas, while transforming the way consumers are charged for our energy. Over 660,000 people have signed the Energy For All petition and 75% of respondents supported the idea in a national poll. The Trades Union Congress, over 250 organisations and businesses, and many MPs agree.

### ENERGY FOR ALL DEMANDS:

 Free energy for each household, covering essential needs. Paid for by higher tariffs on luxury energy use, windfall taxes on fossil fuel corporations, and by recouping the £ billions spent daily on subsidising the fossil fuel industry.

 The upgrade of UK housing using safe, non-toxic, non-flammable insulation appropriate to the building. Sound heating systems installed by skilled workers in consultation with residents. And a requirement for all rented property to be kept in good repair without the costs being forced onto tenants.

Short-term demands include a **permanent ban on the forced installation of prepayment meters**, and the **abolition of standing charges** on energy bills.
